

## LAB SUCTION ARM

Model: SLSA-01

Material: Full Propylene

Unit: mm

Total length: 2.7m

Weight: 7kg

Contains metal parts

Choose the expansion screw with size 8 for base installation

1. PP universal suction hood is an auxiliary device for local passive ventilation, which can effectively reduce the risk of accidental incidents such as running smoke and small leaks during experimental work for laboratory personnel

2. The main functions are ventilation, smoke exhaust, sewage discharge, exhaust, small dust removal, etc.

3. Corrosion resistance, acid and alkali resistance

4. Can be side mounted or top mounted
